

Digital Workspaces Introduction

Digital Workspaces Computer Trading LLC

Digital Technology Solutions, Consulting & Services

Digital Workspaces provide Technology Solutions, Consulting and services for businesses of all sizes across UAE. We provide smart, cutting-edge technology solutions for all your business needs.

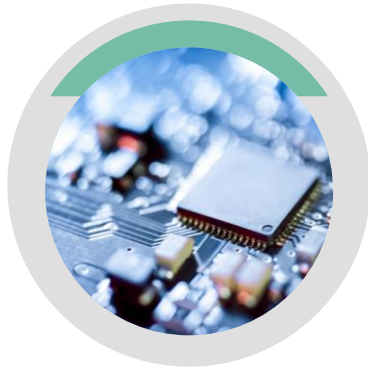

WE SERVE THE DIGITAL TECHNOLOGY WORLD

Digital Technology is everything we do!

CHOOSE DIGITAL

Helping you to choose Digital Solutions to Accelerate value creation in your business with simple-to-use solutions and harnessing the power of emerging intelligent technologies.

ENABLE DIGITAL

Digital enabled businesses create competitive edges based on unique combinations of digital resources. We help you to do enable Digital in your enterprise with the wide range of our Digital solutions.

TRANSFORM TO DIGITAL

Digital transformation is the process you undergo in order to be a Digital Business. We help our customers for the implementation of digital technologies and transform Digital.

OPERATE IN DIGITAL

Most of the businesses still struggle with complex IT and complicated, high-cost, and often error-prone operations. We help our customers to run their Technology Operations in the new Digital age.

OUR SOLUTIONS OFFERINGS

Today, every organization needs to be a digital organization; powered by data, running in on-prem, cloud or hybrid and ready to take on the new normal. We can help you to prepare and create your digital future today.

IT INFRASTRUCTURE SOLUTIONS

IT Infrastructure to enable your Digital Programs

Today's IT organizations struggle to stay relevant in the dynamic marketplace and meet the complexities and challenges of digital business transformation. Growing business demands are forcing CIOs and CTOs to evolve their strategy and modernize their infrastructure to stay ahead of the competition.

Modernizing Your Infrastructure

We bring deep expertise and in-depth knowledge of IT systems integration across various industry verticals. We facilitate enterprise-wide technology integration to deliver a cost-optimized and scalable IT environment.

DWS IT Infrastructure Solutions benefits you to:

- Deploy latest technologies enterprise-wide
- Customize and configure enterprise systems
- Integrate technology systems
- Support migration of systems

CLOUD SOLUTIONS

Enabling an Automated, Scalable and Secure Cloud

Cloud computing is becoming the core necessity of every digital enterprise. Its economies of scale, on-demand scaling and pay as you go model helps organizations to reap the benefits of Digital Technology advancements at optimal cost.

DWS Cloud Enablement and Management Solutions

DWS cloud enablement and management services help your business to seamlessly migrate to cloud and provide the best-in-class IT services to enable digital transformation.

Our cloud deployment and management teams can provide:

- Centralized automation and orchestration of a policy-driven architecture
- Easier integration into Datacenter and Cloud platforms
- Cloud-based Security solutions
- Cloud-based Enterprise Monitoring and Automation

NETWORK & SECURITY SOLUTIONS

Network & Security tailored for business outcomes

Enterprises leverage core business applications which are critical for the day-to-day operations that run on equipment such as Servers, Storage, Network & Security devices, Databases, Middleware etc. DWS understands the need of enterprises to ensure availability of services for all its business applications as it directly affects the performance and productivity of business users.

DWS Network and Security solutions help companies to ensure continuous operation of network infrastructure including branch office connectivity and online presence.

We develop solutions designed around your business needs. Our experienced consultants work with you to design a solution by understanding your business requirements and application integration and rollout plans.

- Datacenter Switching
- Wide Area Networks
- Software Defined Networks
- Network Security

BUSINESS APPLICATION SOLUTIONS

Business Applications that drives growth and efficiency

DWS business applications experts have decades of experience developing custom software solutions for businesses across the country, helping to streamline application workflows, automate repetitive tasks, gain valuable business insights, better integrating their people and technology, and much more.

We use agile software development model, which means your software will be developed through rounds of testing and feedback with your team, ensuring a fast, efficient process that results in exactly the software you want. By collaborating with your stakeholders, we'll leverage our years of experience building user-friendly software solutions to help you discover greater success.

- ERP and CRM Solutions
- Custom Business Applications
- Customer Portals
- Web Application Development
- Business Process Management Solutions

OUR SERVICES OFFERINGS

Your organization has its own unique challenges and characteristics. We understand that better and we serve as an extension of your team.

Make the most out of your technology investments with our service offerings - because bringing people and technology together is what we do best.

MANAGED IT SERVICES

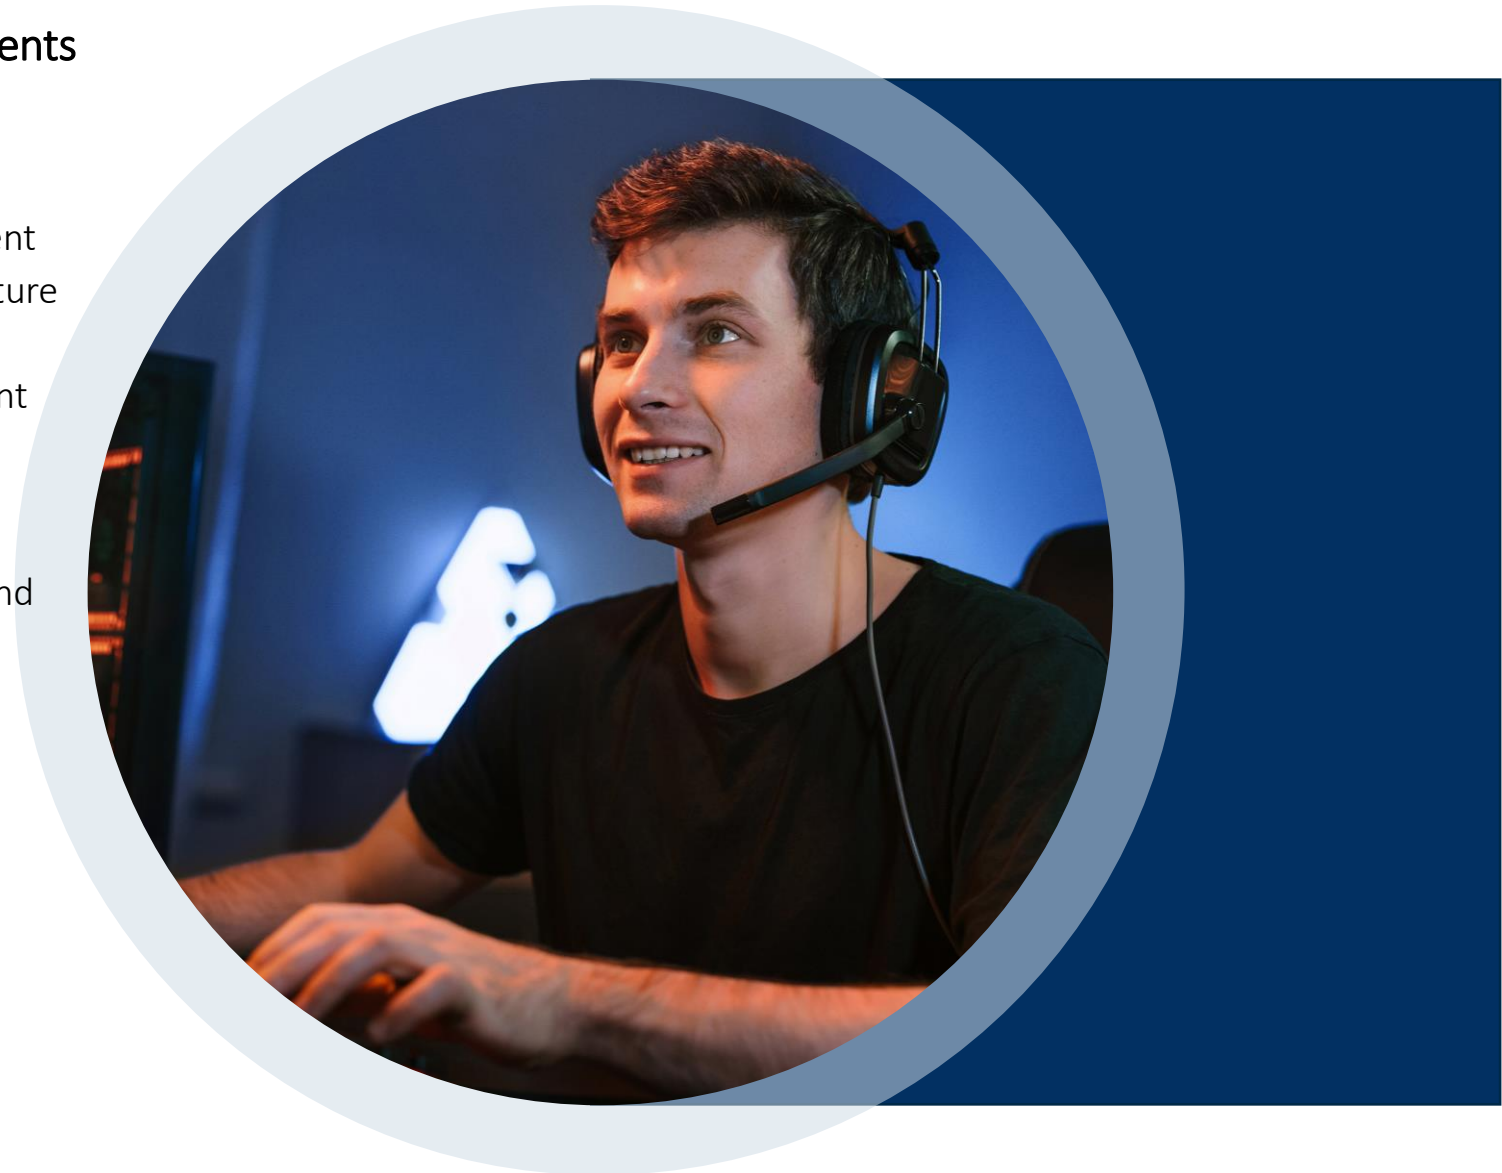

Maximize value of your digital technology investments

DWS Managed Services provide best-in-class IT Services to organizations of various industries and sizes.

Our rich portfolio of services spans the entire IT management life cycle and covers infrastructure management, infrastructure consulting, enterprise networking, end user computing, enterprise security, IT infrastructure operations management and transformation services.

Why DWS Managed Services?

- YoY savings through our differentiated service delivery and advisory services.
- Scalable & flexible pricing options.
- Remote Infrastructure Management.

IT CONSULTING

Helping enterprises to adapt to the changing world

Today's businesses struggle to meet the challenges of the dynamic marketplace and digital transformation. To make it a success, organizations should be equipped with skilled staff, matured processes and the right technology.

We bring deep expertise and in-depth knowledge of IT systems integration across different industry verticals. We facilitate enterprise-wide infrastructure and application integration to deliver a cost-efficient, agile and resilient IT environment for your growing business demands.

Modernizing Infrastructure and Application Integration

DWS Consulting Services introduce modern technologies like Artificial Intelligence (AI), Machine Learning, Robotic Process Automation and Chatbot solutions to facilitate the resolution of complex integration requirements. Automation at various levels can help businesses to optimize cost by self-help and self-heal solutions.

CYBER SECURITY SERVICES

Protecting enterprises against the odds

Cyberattacks can have a devastating impact on businesses. Downtime can cost your business hundreds or thousands of dollars an hour in repair costs and missed productivity, while the loss of sensitive company or client data can be even more costly – often forcing a business to go out of business completely.

DWS Cybersecurity service allows you to focus on your core business – with confidence that our protections and safeguards put in place are optimized and ready to defend you.

- Security Posture Assessment
- Review of existing security controls
- Detailed threat assessment
- Risk & Vulnerability scan
- Proactive Patching and Updates
- Network Security Monitoring
- SOC Services
- Business Continuity and Disaster Recovery planning
